Apply to: Business Analyst Fresher

Dear Hiring Manager,

It is my pleasure to apply for the Business Analyst Fresher position available at your company.

I graduated in Logistics & Supply Chain Management and spent three years working in the logistics industry. The experience equipped me with solid operational knowledge and a data-driven mindset. However, the work became repetitive and offered limited long-term growth, which encouraged me to reflect on my strengths and motivations.

At the same time, I discovered that my true motivation lies in continuous learning, solving problems, and working with technology. I enjoy exploring how systems operate and have a genuine passion for IT—especially when working with tools such as APIs, SQL, Postman, and Figma. This encouraged me to reassess my strengths and career direction.

I wanted a role that aligns with my abilities, offers clear career growth, and allows me to build expertise. That is why I chose Business Analysis—a path that fits both my analytical mindset and my passion for technology.

To prepare for this path, I recently completed BA courses and built a small end-to-end project, practicing requirement gathering, writing User Stories and Use Cases, designing workflow diagrams, and creating acceptance criteria. I also gained basic UAT experience and learned to use AI tools to improve documentation quality.

I am seeking an opportunity that offers strong learning potential and a long-term career path. My goal is to start as a BA Fresher, grow into a Junior BA within a year, and continue progressing toward senior roles as I contribute more value to the team.

Thank you for considering my application. I look forward to the opportunity to contribute to your company.

Best regards,

Nguyen Ngoc Hoang Lan
